Scam Big Marlin

[Rif.: #007]

Beach cleaning machine brought by suitable tractors (80-90 HP) with four-wheel drive, equipped with hydraulic lift. It works for a width of 190 cm. The work capacity indicated by the manufacturer is 7000-15000 sqm./h and over, depending on the quality of the sand (wet, damp, dry) and the condition of the beach. The working depth, adjustable by a hydraulic lift of the tractor, varies from 0 to 20 cm.

The operating system is of the vibro screen type. Ideal system to separate the sand (conveyed on the sieves through the fast rotation of a front roller equipped with four rows of spring tines in special steel) from any type of debris: shells, cigarette butts, caps, cans, bottles, pieces of glass, stones, branches and weeds, beached algae. The waste container, with a capacity of 500 liters, can be unloaded up to a height of two meters.
