Tuareg 165P

[Rif.: #017]

Beach cleaner machine, from the “Pesante” set, that we used to provide until 2011. Best suitable for people who want to sift larger surfaces, maximizing the working time. Thanks to its proper size, it comes out to be not only perfectly suitable for a huge and empty public beach, but it also easily passes through the beach umbrellas. Several companies and Organizations are already using this kind of machine, as well as private beach clubs where a pretty big beach is available. Although the size is still compact, the working power it has, is the same as a contractor machine has. You can use it with any 50/80 horse-powered engine, both orchard and open ground.

Technical info: Working surface 165 cm Width – Up to 15 cm Depth - Chest volume up to 350 lt with hydraulic discharge system - complete heat galvanization protection treatment - Size 170x145x100h - Weight 460 kg

Every part of this beach cleaner was carefully inspected and settled. Every worn-out element of the machine was substituted. The machine was even improved.

A pair of roughing grids (opening 20x20 cm), a pair of finishing grids (opening 10x10 cm), and the drive shaft are included in the price.
