# Scam Marlin B

**[Rif.: #018]**

Beach cleaner machine dragged by appropriate four-wheel-drive tractors (from 50/60 horsepower on out) equipped with hydraulic lifting. The cleaning power the Marlin B machine has, is because of the high-speed rotation of the front roller, together with four rows of special steel mainspring pins which collect the sand into the sifters removing any kind of debris. The machine is perfectly suitable both for sand and common ground whether they are dry, humid, or wet. The trash is loaded into the steel box and discharged afterwards on the floor by a hydraulic system. The worker would be able to control the working depth by moving the hydraulic lifting system of the tractor.

Technical info: Productivity 4000-9000 m2 per hour, depending on the conditions of the sandy-shore and the sand you are working on (wet, humid or dry sand)- Adjustable working depth from 0 to 15 cm by the tractor hydraulic lifting system- Working width 140 cm – Trash chest volume 350 lt - Size 189x152x110h cm - Weight Kg. 430

Every part of this beach cleaner was carefully inspected and settled. Every worn-out element of the machine was substituted.

A pair of roughing grids opening 15x15 cm, a pair of finishing grids opening 8x8 cm and the drive shaft are included in the price.
