Scam Pinguino

[Rif.: #019]

Beach cleaner machine dragged by appropriate four-wheel-drive tractors (from 24/30 horsepower on out) equipped with hydraulic lifting. This machine works perfectly in cleaning sandy surfaces such as beaches or garden centres, green houses, horse riding centres, playgrounds and more. “Vibrating screen system” perfectly spots the sand and brings it back to the ground, free from debris and trash. The sand is charged by the front edge and totally sifted thanks to the high-intensity vibration, the debris are collected into the steel box and tossed to the ground by an hydraulic system . The machine is perfectly suitable both for sandy-shores and common ground whether they are dry, wet, or humid. The worker would be able to control the working depth by moving the hydraulic lifting system of the tractor.

Technical info: Productivity 3000-6500 m2/h per hour, depending on the conditions of the sandy-shore and the sand you are working on (wet, humid or dry sand) - Adjustable working depth from 0 to 12 cm by the tractor hydraulic lifting system - Working width 115 cm - Trash chest volume up to 125 lit. Size 125x116x82h cm - Weight 140 Kg.

A pair of roughing grids opening 15x15 cm, a pair of finishing grids opening 8x8 cm and the drive shaft are included in the price.
